Suspended Terminal Monthly Fee	\$10	\$10	\$10	\$10	\$10	\$10

*Additional airtime minute rate applies to voice (telephone), fax, or data airtime use and is charged when telephone airtime usage has exceeded the included monthly airtime minutes.

NOTES

1. All LightSquared Satellite Telephone Service rate plans are listed “per satellite radio” and require a **1-year minimum contract commitment**.
2. Subscribers must have a billing address in the United States or its territories.
3. Actual coverage is subject to verification. Performance may vary due to look angle and line-of-sight constraints. **Feature availability (such as MSAT-G2 Tracking and MSAT data service) may vary by manufacturer and configuration of phone and antenna.**
4. Airtime rate per minute applies to all airtime usage including voicemail, other call management features and fax or data. Each partial minute of airtime is billed as a full minute for LightSquared Satellite Telephone Service.
5. Included monthly airtime minutes will not be “rolled over” to subsequent month or pooled within an account.
6. Long distance toll rates included in the per minute airtime rate for all calls terminated in the continental United States, Alaska, and Hawaii. International calls are billed at specified airtime rate plus applicable international toll (based on AT&T’s residential direct dialing rates). International tolls are rated to the prevailing Eastern Time and may vary by time of day.
7. There is an extra \$10 set-up fee for each call management feature requested. (ie: call waiting, call forwarding, voicemail, etc.)
8. LightSquared’s Satellite Telephone Service rates do not include dispatch service (see current LighSquared Satellite Dispatch Service rates for pricing).
9. Rates subject to change.
10. The one time suspension fee is assessed at the time of suspension. There is no cost to resume service to a suspended unit.
11. *MSAT-G2 Tracking* is offered strictly with the MSAT-G2 Satellite Radio. The Standard *MSAT-G2 Tracking* option assumes subscribers will use their own application in accordance with LightSquared’s Application Interface documentation. The Enhanced *MSAT-G2 Tracking* option provides access to a MSAT-G2 web-based mapping application package. Position reports are automatically generated for telephone (or dispatch) calls; additional polling requests by subscriber are subject to the “per poll” fee.
