Say hello to the new TracPhone V3!

TracPhone V3 Enhanced Voice Service... the Best in the Business!

TracPhone V3's Enhanced Voice Service is a managed solution optimized for satellite communications and fully integrated into the mini-VSAT Broadband solution. Enjoy critical advantages, including significantly lower bandwidth use compared to off-the-shelf VoIP solutions and network voice prioritization that protects the bandwidth allocated to each telephone line to guarantee the high quality of your voice connection. As a result, voice quality takes priority and remains outstanding even while other users surf the web, log into corporate networks, or send and receive e-mail. Plus, make calls to land or cell phones anywhere in the world for only \$0.49/min USD¹.

With TracPhone V3's Enhanced Voice Service you are guaranteed always-on voice connections, no interruption to voice conversations when data transmissions occur at the same time, and a great suite of convenient features and account management tools that you can access anywhere in the world!

mini-VSAT Broadband Coverage

The TracPhone V3 offers a tremendous coverage area with high-speed, reliable Internet and voice connections, bringing this exciting new service to virtually anywhere you travel. For up-to-date mini-VSAT Broadband coverage information, visit: www.kvh.com/minivsatmap
