World's Smallest Satellite Phone

**Smaller.
Sleeker.
Sturdier.**

Thuraya introduces breakthrough technology in its new SO-2510 satellite phone, setting the standard for the smallest and most robust satellite handset in the industry today.

The new generation Thuraya handset is powerful and compact offering total convenience and mobility.

With Thuraya's new satellite phone, you can enjoy uninterrupted, seamless, border-to-border satellite telecommunication services in more than 110 nations in Europe, most of Africa, the Middle East, Central and South Asia.

The new Thuraya phone opens up the boundaries in communication, enabling you to go even further.

The Smallest

Carrying a satellite phone has never been easier. As the world's smallest and lightest satellite phone ever made (only 130 g), the lightweight pocket size handset is designed to be highly portable and easy to use.

Mobility Unlimited

Thuraya SO-2510 offers satellite services in a mobile handset that is as compact and light as a GSM phone. It is a robust, dynamic phone designed for high performance satellite telephony in the harshest of environments where no other type of communications is unavailable.

GPS Services

In addition, the Global Positioning System (GPS) feature in the handset facilitates reaching destinations while travelling in remote and unconnected areas within Thuraya's network.

Wide Range of Services

Elegantly designed with a high-resolution coloured screen, Thuraya SO-2510 offers a wide range of services including voice, data, fax, short messaging as well as GPRS services.

More Features

Thuraya's SO-2510 comes with enhanced memory and great polyphonic ringtones. The phone supports more than 10 languages including Arabic, English, Farsi, French, German, Hindi, Spanish, Russian, Urdu and Turkish.
